**Concert Brass Legacy Installation - Mac** (Using UnRarX)

Make sure you have at least 42GB of space where you intend to download your library. (Space for the downloads and the following extraction of the downloads)

Download all .rar files from your download list.

By defaualt, you will need to download the files manually. However, you can try "Free Download Manager" as long as you are running OS 10.9 or newer. If you wish to use this download manager, you can download it by clicking HERE. PLEASE NOTE that we do not provide any assistance for this manager. We just provide it to you as a possible easier way to download so many files. Try going online for the many tutorials available for this application's use and installation.

IMPORTANT: Make sure that all of the .rar files are exactly the same size except the last one. If this is not the case, then some kind of error has occurred during the download process.

## LOADING INSTRUMENTS IN KONTAKT

IMPORTANT: You do NOT need to go through the "Add Library" process for this product. There is no Native Instruments registration necessary.

Any folder with "Instruments" in its name, will contain, whether in its own directory or subdirectories, the .nki files you need to load. ".nki" file are Native Instruments's files that are actually a Kontakt instrument. For example, to load TVEC4 French Horns, go to the following directory, and right-click any .nki file, and open with Kontakt 5.4.1.211 or newer.: (You can also open from within Kontakt's browser. Please familiarize yourself with using Kontakt for this.
